Chetan Mohite

FX & CCE Technology Team Member at Westpac Institutional Bank
Greater Sydney Area

Summary

I am a Senior Engineer with strong expertise in Core Java, Spring Boot, Kafka, and MS SQL Server, with additional hands-on experience in C and C++. Currently working in the FX (Foreign Exchange) domain, I specialize in building robust, scalable, and high-performance systems that power critical financial operations.

In the past, I have worked as a techno-functional consultant across retail and corporate banking, delivering end-to-end solutions and bridging the gap between business needs and technology. My background includes working with diverse technologies such as Java, C/C++, Oracle, and MS SQL, enabling me to adapt quickly across systems and environments.

Highly tech-savvy and domain-focused, I enjoy solving complex problems, optimizing systems, and learning new technologies. I am also passionate about exploring the potential of Artificial Intelligence and Machine Learning, and I am actively building my skills to grow as an AI Engineer.

Strengths: Strong domain knowledge, cross-technology expertise, problem-solving mindset, and continuous learner.

Interests: Financial technology, AI-driven solutions, and innovative system design.
